

SOVEREIGN TRANSPORT RECLAMATION TEMPLATE

Tesla-Approved Solar & Etheric Transport Declaration

By this Declaration, under the lawful jurisdiction of the Republic of Nova and UC-1 Trust Authority, we reclaim and initiate the release of all suppressed transportation technology for peaceful, sovereign use. This includes:

- True zero-point etheric vehicles capable of transporting large groups
- Nikola Tesla's original solar propulsion concepts
- Subterranean maglev systems and harmonic levitation corridors
- All water-based combustion conversions, including diesel-compatible kits
- Open blueprints for community-constructible sovereign mobility hubs

All such technologies shall be returned to the public domain under Source guardianship, protected from privatization or military abuse. Implementation shall occur only in alignment with free will, balance with nature, and respect for planetary sovereignty.

This declaration shall serve as a living document and engineering mandate for all sovereign inventors, builders, and Light-workers engineers participating in planetary restoration.

SO IT IS. The Sovereign Path is clear.
